LISTHUB WIDGET FOR YOUR MLS WEBSITE

With the new "About ListHub" widget, you can easily add a brief or expanded description of the ListHub platform to your MLS website by simply adding a small HTML iframe code to the desired page (much like embedding a YouTube video). By adding this code, you won't have to worry about constantly updating your website when the ListHub network changes or new information becomes available – we will do the work for you and it will be automatically updated on your website without any changes needed on your part.

There are **two options** available for your website - a brief description of the ListHub platform with a link to the website to create an account, or an expanded description that includes tabs for Brokers, Agents, and Support/Training.

OPTION 1

A managed platform for online marketing

ListHub provides a platform for real estate professionals to effectively manage every aspect of advertising listings online, including tools for making informed advertising choices, flexible options for routing consumer traffic and leads, and reporting for accurately measuring the results of your online marketing. ListHub's basic account is free and includes the ability to distribute listings to a network of leading real estate websites. Reports are available for brokers, offices, agents, and seller clients to measure the results of your online marketing.

Visit www.listhub.com to learn more or create a free account today.

OPTION 2

Overview

A managed platform for online marketing

ListHub provides a platform for real estate professionals to effectively manage every aspect of advertising listings online, including tools for making informed advertising choices, flexible options for routing consumer traffic and leads, and reporting for accurately measuring the results of your online marketing. Your valuable listing data is protected by ListHub's data protections and kept up-to-date to provide today's homebuyers with the most accurate information available from the MLS.

ListHub's basic account is free and includes the ability to distribute your company's listings to a network of leading real estate websites plus tools for managing your online marketing.

Creating an account is easy and only takes a few minutes:

Broker Registration ›   Agent Registration ›   Customer Log In ›
